### ABSTRACT:

This is a case of elongated styloid process also called as "EAGLE'S SYNDROME". The patient was suffering from this condition associated with the elongation of the styloid process or calcification of the stylohyoid ligament, clinically characterised by throat and neck pain, radiating into the ear. She tried other pathies to get relief and was finally advised surgery. But her fear for undergoing an operation led her to try Homoeopathy. Conclusion - The elongated styloid process may not reduce in size without surgical intervention but with the right homoeopathic treatment it will definitely diminish the pain. The patient was given Pulsatilla based on her mind symptoms and physical generals.
